Dragon speech recognition
Nuance Dragon Professional Group

Feature matrix

Dragon Professional Group— focus on business, not documentation.

Empower employees to create high-quality documentation faster and more eficiently, while saving your business time and money, with Nuance® Dragon® Professional Group enterprise-ready speech recognition.

Feature	Description	Enhanced features
Delivers high recognition accuracy with the ability to learn and adapt to a variety of accents and environments, with a next generation speech engine powered by Nuance Deep Learning technology	Ideal for diverse work groups and settings: – Optimized for speakers with accents, such as regional dialects – Optimized for users working in noisy environments, such as an open ofice or mobile setting – Dragon learns words and phrases used most to minimize corrections and adapts to the user's voice while dictating	•
Use powerful transcription tools to eliminate transcription bottlenecks, cut reliance on outsourced services, and reallocate support staff to more high-value, billable tasks	Turn recorded audio iles into transcribed documents instantly: – Use the Auto Transcribe Folder Agent (ATFA) to transcribe batch iles of audio recordings – Transcribe individual audio iles – Transcribe another single speaker's voice from pre-recorded audio iles or podcasts with no training	
	New enhanced transcription features include: – Streamlined setup and improved proile management – No proile training required for transcription – Fast, post-recognition process automatically applies basic punctuation	•
Use custom voice commands to automate repetitive tasks and increase eficiencies	Execute multi-step processes to reduce repetitive steps: – Create custom voice commands to insert signatures or standard clauses into documents – Create time-saving macros to automate multi-step tasks, such as form-illing – Once created, share custom commands across the Dragon user community	
Work quickly and accurately by voice within the latest business applications	Web and desktop applications with enhanced dictation within applications including: – WordPerfect® X8 – Skype™ for Business	•
Minimize post-editing with formatting and other recognition improvements to speed document turnaround	Improved recognition of numbers and email address formatting, hyperlink formatting in auto-texts, and place names based on how we naturally speak, resulting in fewer overall corrections. For example: – "three double two ive" > "3225" – "John dot Smith at Nuance dot com" > john.smith@nuance.com	•

Feature	Description	Enhanced features
Use powerful mobility features to enable mobile professionals or ield workers to complete documentation away from the ofice	Seamless synchronization of Dragon across PCs, iOS® and Android™ devices using Dragon Anywhere Group, Nuance's cloud-based mobile dictation solution: – Create reports or other documents with no time or length limits – Import and export to and from popular cloud-based document-sharing tools – Manage users, accounts, and customizations through NMC	
	– Now optimized for popular touchscreen PCs	•
Dynamic proiles enable professionals to beneit from Dragon from any shared computer location	Administrators set and store user settings such as custom words, custom commands, and PowerMic settings with central administration through the NMC: – Users can start dictating with Dragon on any shared PC with no set-up required	•
Reduce repetitive stress injuries (RSIs)	Enable professionals to create documents and perform other computer tasks—all by voice, and reduce the physical strain of typing. Support for Section 508 accessibility standards.	•
Empower professionals with a Nuance PowerMic option, a high-quality, handheld microphone that makes it easy to switch back and forth between dictation and other tasks, while not being tethered to the computer	PowerMic is faster and more convenient than using a headset microphone, is ideal for on-the-go situations or for high levels of dictation, and offers better accuracy than a built-in laptop microphone when working in noisy environments: – Dictate edit, navigate and review documents – Program buttons to automate steps such as advancing sequentially through form ields	
Support for Citrix ® virtualized environments	Deploy on Citrix XenApp® or Citrix XenDesktop® servers where the target application resides, enabling users to dictate from workstations that do not have Dragon installed on them	
Centralize administration through the Nuance Management Center (NMC) for signiicant cost savings	Provides powerful, yet easy-to-use centralized user administration to help organizations ensure eficient use of licenses and meet requirements for reporting accuracy: – Track employee usage of Dragon – Assign, switch licenses or redistribute licenses via a license key – Manage or share customizations, including custom words, commands and auto-texts, across multiple users	
Flexible volume licensing programs	Ability to license as part of the OLP (Open License Program). Designed to help organizations realize improved productivity at an affordable price.	•

Nuance Communications is reinventing the relationship between people and technology. Through its voice and language offerings, the company is creating a more human conversation with the many devices, electronics, apps and services around us. Every day, millions of people and thousands of businesses experience Nuance through intelligent systems that can listen, understand, learn and adapt to your life and your work.
